

CYSTOSCOPY

This procedure allows the doctor to view inside your bladder for adhesions or any another abnormalities. It is a minimally invasive procedure with little to no pain.

The physician will insert a camera into your bladder which will allow the physician (along with the patient) to view this image on a monitor.

This procedure takes less than 10mins. and you will be able to return to normal activities after it's done. When the procedure is done the doctor will prescribe an antibiotic and you need to take the medication as directed by the doctor.

Please inform the doctor of any allergies to penicillin or iodine.
